Status of Claims

1. Claims 27-53 have been examined.

Reasons For Allowance

2. Claims 27-34 and 41-53 have been allowed.

The present invention is directed towards a computer jukebox. The instant application teaches a system whereby a computer jukebox receives, retrieves and stores in memory digitized song data and song identity data in response to a song selection by a user. The system also uses a digital to analog signal conversion process in order for song data to be processed by an audio speaker. But, these features are also found in the closest prior art. Armin et al. (DE 4,021,707) teach a jukebox system that receives digitized song data over an electronic network and uses digital to analog signal conversion to output the data through audio speakers (abstract; column/line 1/30-2/4 and column 2, lines 27-33). However, the present invention also teaches displaying a user attract mode and song selections based on the song identity data (claim 27, paragraphs 4 and 7; claim 41, paragraphs 8 and 11; claim 48, paragraph 4). This is not taught in

the prior art, as Armin et al. instead use a static display which merely presents to a user the songs available for selection, which is a feature that is also found in the present invention.

3. Claims 35-40 have been allowed.

The present invention is directed towards a computer jukebox management system. The instant application teaches a system whereby a central management system transmits to a computer jukebox digitized song data and song identity data. But, these features are also found in the closest prior art. Armin et al. (DE 4,021,707) teach a jukebox system that uses a central computer to transmit digitized song data over an electronic network (abstract). However, the present invention also teaches a central management system that stores and distributes user attract data to a computer jukebox (claim 35, paragraphs 2 and 3). This is not taught in the prior art, as the central computer of Armin et al. does not transmit user attract data and the computer jukeboxes use a static display which merely presents to a user the songs available for selection.

4. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Armin et al. teach a computer jukebox system
- "Let Froxsystem Entertain You — For a Mere \$10,000: Frox's audio and video is a high-tech junkie's dream
